Professional Summary

AI and Data Science Master's student seeking an AI Intern role. Experienced in machine learning, computer vision, AI security, and data processing, with hands-on work in end-to-end ML pipelines, deep learning systems, and privacy auditing workflows. Strong interest in model robustness, data leakage analysis, and practical intelligent systems.

Education

Master's in Intelligent Processing Systems (In Progress)

September 2025 – June 2027

Faculty of Science, Rabat

Bachelor's Degree in Computer Science

September 2022 – July 2025

Faculty of Science, Rabat

- Member of the Competitive Programming Club

Publications

Anomaly-Based Intrusion Detection System in IoT Environments using TinyML

IJCA, 2025

- Developed an optimized anomaly detection framework for resource-constrained IoT devices
- Achieved high detection accuracy using quantized autoencoders and TinyML techniques
- Simulated Deployment: Leveraged ns-3 to model a network of IoT nodes, validating model performance (latency and throughput) across simulated devices before hardware prototyping.
- DOI: 10.5120/ijca2025926000

Technical Skills

Programming: Python, Java, C++, PHP, JavaScript, SQL, HTML/CSS

AI & Data: Machine Learning, Deep Learning, Computer Vision, TinyML, Anomaly Detection, Data Analysis, Data Processing

Networking & Security: CCNA Networking Concepts, Network Routing, IoT Systems

Tools: Git/GitHub, PyTorch, TensorFlow, OpenCV, Cisco Packet Tracer, VMware, NS-3, LangChain, LangGraph, Deepgram, Mistral, Ollama, Groq

Projects

AI Privacy Forensic Auditor

- Developed a modular AI forensic pipeline to audit model privacy using Membership Inference Attacks (MIA)
- Performed large-scale data processing on 48,000+ census records, including automated cleaning, feature encoding, and PCA-based multivariate analysis
- Implemented a Reliability Module using 95% confidence intervals across 10+ stratified runs to evaluate model stability and uncertainty

AI Video Detector (AI-Generated Video Detection)

- Built a deep learning pipeline for detecting AI-generated videos using feature extraction and classification techniques with an 86% detection accuracy
- Implemented and iteratively optimized training and evaluation workflows for video authenticity detection
- Managed dataset preprocessing, experimentation, and model improvement workflows

NPCs – AI-Driven Interactive 3D Game World

- Built AI-driven NPC behavior with LangGraph pipelines for perception, memory, and response generation
- Implemented a trust and emotion system with long-term memory through LLM-based summarization
- Designed a dynamic quest and karma system to drive adaptive world events and NPC interactions

Experience

Freelance WordPress Designer

- Created responsive websites using custom themes and plugins
- Improved usability and performance optimization

Freelance Programming Tutor

- Taught beginner and intermediate programming concepts through project-based learning

Competitions

- Game of Codes – INSEA, Rabat
- MNPC – UM6P, Benguerir
- Africa Science Week & Tamkeen Initiative – Rabat

Certifications

- CCNA: Enterprise Networking, Security, and Automation – Cisco Networking Academy
- Fundamentals of Deep Learning – NVIDIA, 2024
- Communicator Certificate – ICCT, 2025
